\* They must have a bad location. This begs the question, "Where are the locations for all processing facilities and which landfill will receive the material that will be landfilled?"

\* They must have almost no contingency plan. Why were they scored so low, and what contingency plans will the staff have?

\* How can they be the only respondent and still only score 71%?

NOTE: As per Section 252.049 of the local government code, contents of a proposal shall remain confidential until a contract is awarded. Therefore, the matrix will include points awarded for price but exact pricing will not be disclosed.

This is ridiculous. The full contract, along with the incorporated RFP response, should be produced before being considered by ZWAC, Council and other Commissioners. The RFP Scope of Work clearly includes the flow control of solid waste, compostables and recyclables, as well as the City requiring all compostables and recyclables having to be given up to City ownership and control. Also, the scope of work allows for City control over what are now commercial accounts serviced by private haulers, composters and recyclers.
