\* See your community flood plain administrator for more information.

\*\* See your Flood Insurance Study(FIS) Text or FIRM Panel to determine the BFE Vertical Datum.

Risk Level	Flood Hazard Zone
<b>High Flood Risk</b>	<b>AE, A, AH, AO Zone.</b> These properties have a one percent chance of flooding in any year - and a 26 percent chance of flooding over the life of a 30-year mortgage. <b>Insurance note:</b> High-risk areas are called "special flood hazard areas" and flood insurance is mandatory for most mortgage holders. See your local insurance agent or visit floodsmart.gov for more information.
<b>Low or Moderate Flood Risk</b>	<b>Shaded X Zone.</b> These properties are outside the high-risk zones. The risk is reduced but not removed. Examples include X Protected by Levee, X Areas of Special Consideration and X 0.2 Percent Annual Chance Flood Hazard Areas. <b>Unshaded X Zone.</b> These properties are in an area of overall lower risk. <b>Insurance note:</b> Lower-cost preferred rate flood insurance policies (known as Preferred Risk Policies) are often an option in these areas. See your local insurance agent or visit floodsmart.gov for more information.

**Disclaimer**

While the floodplain data that is shown on the map is the same, this map is not an official FEMA Digital Flood Insurance Rate Map (DFIRM). This Interactive Mapping Tool is not intended for insurance rating purposes and is for information only. The positional accuracy may be compromised in some areas. The map is not 100% accurate in locating your address. Please contact your local floodplain administrator for more information or to view an official copy of the Flood Insurance Rate Maps.
